SourceOne Partners with Gee Lawson For Exclusive European Distributor Agreement

***Focus on Advanced Delivery System Technologies,
Patented Ingredients, and Innovative Formulations***

CHICAGO, IL -- SourceOne® Global Partners ("SourceOne") has announced it has reached an exclusive distribution agreement with Gee Lawson (London, England) for key European countries.

Gee Lawson, established in October 1939, is a leading nutritional/life science ingredient and specialty chemical distributor with selected approved supplier networks and global resources to deliver expert knowledge and quality solutions to its customers.

According to Jesse Lopez, CEO and founder of SourceOne, the partnership between SourceOne and Gee Lawson will help to meet the growing consumer demand for enhanced bioavailability, absorption and efficacy of unique science-based ingredients and proprietary formulas through the use of innovative delivery system technologies such as VESIsorb®. The patented VESIsorb delivery system is an innovative Swiss technology that features a naturally self-assembling colloidal droplet system. It has been clinically tested and shown to increase the bioavailability of science-based nutritional supplements, functional food and beverages, and cosmetic ingredients.

SourceOne has recently added several new patented ingredients like Cholestrinol™ HPe, GymnePURE®, and LeptiPURE™ to its constantly growing IP portfolio of natural product solutions.

Jesse Lopez, CEO and Founder of SourceOne, states, "I've known Jonathan Shorts, Managing Director of Gee Lawson, for many years and I have the utmost respect and appreciation for him and his team. Their expertise representing branded ingredient suppliers is peerless and their reputation for having an uncompromising commitment to science, innovation, quality, and integrity is why we chose them."

Jonathan Shorts, Managing Director of Gee Lawson, comments, "We've watched SourceOne's innovation and technology platform grow and evolve with the needs of the marketplace. Our commitment to delivering the best natural science-based ingredients and delivery system technologies to our customers makes representing SourceOne strategically important to our long-term success meeting customer needs for differentiated products."

Shorts adds that securing the VESIsorb technology will allow key brands to develop their sales through working with the Source One/Gee Lawson partnership as well as developing products and being able to purchase finished dosage forms. "By having the VESIsorb® technology, Gee Lawson has made a solid first step in continuing our growing value-added propositions," said Shorts.

Lopez adds, "The complexity of our business continues to grow as we broaden and deepen our IP portfolio and global partner relationships. Gee Lawson allows us to continue to focus on our global vision while acting locally, leveraging their established relationships and hands on customer care."

About SourceOne™ Global Partners

SourceOne Global Partners, headquartered in Chicago, IL, is a leading provider of health and wellness solutions, created through scientific research and innovative product development.
