SourceOne Captures Global Distribution Agreement For GymnePure™: A Patented Healthy Blood Sugar Ingredient

Partnership with Santal Solutions delivers superior safety and efficacy for growing market

CHICAGO, IL -- SourceOne® Global Partners ("SourceOne") has announced it has reached an agreement with Santal Solutions, Appleton, WI, wherein SourceOne is awarded exclusive global distribution rights for Santal's signature blood sugar health compound, GymnePure, its patented *Gymnema sylvestre* extract.

Arun K. Chatterji, PhD, founder, chairman and CEO of Santal Solutions, points out the distinction of GymnePure over other extracts. "GymnePure has been shown to increase insulin production at a much lower dosage level than standard *Gymnema sylvestre* extracts. Further, multiple studies have shown the extract's significant effect on promoting healthy blood glucose levels."

Chatterji added that because of GymnePure's superiority, Santal Solutions needed a partner that could ensure brisk sales and marketing development: "We are delighted to reach this agreement with SourceOne as it is recognized as a leader in delivering innovative science-based solutions," he explains.

Jesse Lopez, Founder and CEO of SourceOne, comments, "This agreement with Santal Solutions and GymnePure ensures we continue to add to our robust IP portfolio with health condition-specific products for the most pressing consumer health concerns."

And, according to Lopez, November is Diabetes Awareness Month, which presents an opportunity to discuss new healthy lifestyle habits for those with diabetes as well as to strive for smart prevention.

Diabetes is a devastating disease without a cure, and one that increasingly affects older Americans. The American Diabetes Association (ADA) estimates that more than 10.9 million U.S. adults over the age of 65 suffered from diabetes in 2011 with another 79 million individuals over the age of 20 classified as pre-diabetic. "Because diabetes increases the risk of developing other serious health conditions, such as coronary heart disease (CHD), prevention is the best option," says Lopez. "But for those who do develop diabetes, lifestyle changes and smart supplementation can help."

"Therefore," he continues, "strategically, GymnePure is a distinguished addition to our line of heart health ingredients and formulations either as a stand-alone product or in combination with patented Cholestrinol™ HPe, or one of our many VESIsorb® formulations."

About SourceOne™ Global Partners

SourceOne Global Partners, headquartered in Chicago, IL, is a leading provider of health and wellness solutions, created through scientific research and innovative product development. The Company's focus is on clinically proven formulations, combined with technologically-advanced and patented delivery systems with applications in nutritional supplements, functional food and beverage, medical food, and personal care markets. The formulations are bundled in easily identifiable platforms that address condition-specific, consumer health concerns.
