

# Brain Pro Sport 3.0®

Doctor formulated with the patented VESIorb® colloidal droplet delivery system for dramatically improved absorption of vital brain health nutrients.

## Concerned about Brain Health and Cognitive Support?

Brain Pro Sport 3.0® is highly recommended for anyone concerned about long term brain health, vitality, mental focus and potential memory loss. For the tens of millions of baby boomers suffering from age related cognitive decline and the growing number concerned about memory loss... **a natural solution is here!**

This is the ultimate formulation of super antioxidants and powerful bio-actives that support brain cell fluidity and the body's natural inflammatory responses.

## Fast acting and optimal absorption and bioavailability of DHA Omega-3, Phosphatidylserine and Phosphatidylcholine; all three vital nutrients scientifically proven to support brain health.

**Phosphatidylserine:** Is a vital brain nutrient for memory, mood and stress. Phosphatidylserine (PS) also emerged as an advanced brain nutrient in Europe. It has been tested in some 25 double blind placebo controlled clinical trials. In 2003, the **U.S. Food and Drug Administration (FDA)** granted PS a coveted **“qualified health claim”** related to its brain health benefits. **The PS used in this formula is patent protected.** It can also help combat physical stress, such as from intense exercise. For bicyclists doing long rides, PS seemed to promote better mood, faster heart rate recovery, and increased endurance time. Weightlifters reported noticeably less muscle soreness and markedly better well-being from taking PS, as compared to placebo.

**DHA Omega-3:** Known as “brain health Omega-3” with hundreds of studies supporting benefits for pre-natal, children, and brain health for all ages.

**Phosphatidylcholine:** An important cell membrane phospholipid used by our brain to synthesize Acetylcholine, a major neurotransmitter essential for normal parasympathetic function.

Brain Pro Sport 3.0® is produced in a GMP NSF Sport Certified facility in the U.S.A to surpass all pharmaceutical grade standards for freshness and purity.

In addition to these 3 vital brain health nutrients, Brain Pro Sports® features five more powerful ingredients proven to help support brain function and help maintain healthy inflammatory response.

**CoQSource® CoQ10:** This vitamin like substance is a key component in the energy producing pathway of the body. 95% of the Energy generated by the body in the form of ATP is due to this essential coenzyme.

**CURCUMIN:** This yellow colored pherol derived from turmeric is an effective antioxidant. It is proven to support the body’s healthy inflammatory response by acting directly on certain transcription factors.

**QUERCETIN:** A plant derived Flavonoid. This powerful substance exhibits properties that help maintain the natural inflammatory response.

**TocoSource® TOCOTRIENOL:** Virgin Red Palm Oil Tocotrienol functions as antioxidant for promoting the natural detoxification process.

**GammaSource® GAMMA TOCOPHEROL:** Thought to be the most powerful tocopherol in its family, this ingredient is renowned for its antioxidant activity and role in supporting healthy inflammation.

Key Features and Ingredients	Brain Pro Sport 3.0®	Focus Factor	Brain Health GNC	Cognitive Support VitaCost	Brain Armor Martek

## Featuring VESIsorb® “absorption and bioavailability”

The patented VESIsorb® self-assembling colloidal droplet delivery system is technologically advanced and more scientifically sophisticated than other so called “enhanced absorption systems.”

The superiority of the delivery system has consistently been demonstrated in well-designed pilot and peer reviewed published pharmacokinetic absorption and bioavailability studies.

**VESIsorb®...“Less Is More”**
