

# Ultimate Red Yeast Rice™

The most advanced patent protected natural cholesterol and triglyceride support formula ever developed.

## Looking for a Safe, Consistent, and Effective Natural Red Yeast Rice Formula that Supports Healthy Cholesterol Naturally?

Unfortunately most red yeast rice products are inconsistent, unregulated, and potentially unsafe!

There are no regulatory standards for amounts of lovastatin and other monacolins in red yeast rice products and these levels are rarely listed on the label. This makes it very difficult to gauge the safety and efficacy of standard red yeast rice products.

For example, tests by “**ConsumerLab.com**” of ten red yeast rice products showed a 100-fold range in total lovastatins! (SourceOne can provide a copy of the full report).

## Meeting the need for Statin Drug Intolerant Patients

Physicians report a significant percentage of their patients either can't or won't take statin drugs like Lipitor, Crestor or a generic statin.

Ultimate Red Yeast Rice™ is a one-of-a kind 5-in-1 synergistic formulation, never before available. The key ingredients have been clinically proven to deliver natural support for healthy total cholesterol, LDL cholesterol, triglycerides, and HDL cholesterol.

Cholesstrinol™ HPE delivers multiple heart health benefits working synergistically with the US produced organic red yeast rice and CoQsource® Coenzyme Q10 the most absorbable and bioavailable coenzyme Q10 formulation, in the patented VESISORB® delivery system.

Each biologically active science-backed ingredient in Ultimate Red yeast Rice™ was carefully selected to work together for maximum heart healthy benefits.

**Your doctor demands this prescription quality you can trust and the natural heart health benefits you deserve.**

## 5-in-1 Formulation for Optimal Heart Health

- ♥ Organic Red Yeast Rice's has been used for centuries in eastern medicine for promoting heart health.
- ♥ One recent Red Yeast Rice study of several years duration among people with a previous heart attack showed a significant decrease in recurrent heart attacks, heart attack-related deaths, and the need for angioplasty or heart surgery (Lu, Am J Cardiology 2008).
- ♥ Cholesstrinol™ HPe is a clinically proven patented combination of PMF-source® Citrus Flavones, TocoSource® Palm Tocotrienols and ErioSource™ Eriocitrin.
- ♥ TocoSource® Palm Tocotrienols have also been found to support healthy total serum cholesterol and LDL levels by degrading the enzyme HMG-CoA reductase, which is responsible for producing cholesterol. By inhibiting the enzymatic actions of HMG-Co-A reductase through a post-transcriptional mechanism tocotrienols support the body's ability to naturally balance cholesterol synthesis without the harmful side effects observed with statin drugs.
- ♥ PMF-source® Citrus Polymethoxylated flavones (PMFs) are a subclass of citrus bioflavonoids distinguished by an extra methyl group. This occurs naturally and, as a result, nature has produced an extremely bio-active and potent molecule. This is especially true for Tangeretin and Nobiletin, two of the primary polymethoxylated flavonoids in Cholesstrinol™ HPe.
- ♥ PMF-source® Citrus Polymethoxylated flavones (PMFs) (Tangeretin and Nobiletin) decrease diacylglycerolacetyl transferase, a liver enzyme needed for endogenous synthesis of triglycerides.
- ♥ ErioSource™ Eriocitrin (eriodictyol 7-O-β-rutinoside), a flavonoid glycoside, is the key flavonoid in lemon fruit (citrus limon). Eriocitrin is very elusive and is the most soluble of all flavonoids.
- ♥ The Coenzyme Q10 in the VESIsorb® delivery system has been clinically proven to dramatically increase the therapeutic benefits your body receives from the CoQ10 in the Ultimate Red Yeast Rice™ Formula.

## Consistent Patent Protected Formulation Batch to Batch... Capsule to Capsule

**VESIsorb®...“Less Is More”**
